WHY KOHLTECH:

ULTRA WIDE VIEW LENS

Up to 130-degree field of view captures more area than standard 120-degree cameras. Captures rear of truck virtually edge to edge ensuring side swipes and near misses are captured. Dramatically improves driver field of view while backing up helping to avoid unseen obstacles.

HD CAMERA

1080p (2mp) ensures higher detail at further distances. Provides almost double the resolution of 720p cameras necessary for license plate and facial recognition.

NO IR REFLECTION

Unique camera design eliminates IR reflection at night from dirty lenses. Powerful external illuminators ensure high quality video in total darkness and enhanced clarity for safer night operations.

900 FT+ VIEW

See farther than ever before with a 900ft+ view distance and a 30ft+ view at night.

IP69K WATER PROOF

Waterproof/Dustproof rating: IP69K, with shock resistance of 17.3G.

MAGNETIC BASE

Integrated battery and camera, strong magnetic base and easy installation.

POWER PROTECTION

On board Super Capacitors ensure uninterrupted power to the system when vehicle power is interrupted with dead batteries or while jump starting. Ensures file system protection and safe shutdown of system to eliminate data corruption.
