Remove the liability and protect reputation with our video encryption feature. All video provided will come with driver identity protection. Videos can be unmasked per written request signed by designated facility representative for an additional fee.

## Video with Driver Identity Protection

The screenshot displays the KOHLTECH VIDEO MANAGEMENT CENTER interface. The top navigation bar includes 'Live', 'Playback', and 'Evidence' tabs. The main area is divided into three sections: a left sidebar with a search bar and a list of vehicles (TRUCK\_127 to SAFETY\_46), a central video grid, and a right-side map. The video grid shows four camera views: 1. External view of a truck at a loading dock. 2. Driver's perspective from the cab, where the driver's face is obscured by a pixelated blur. 3. Close-up of the driver's hands on the steering wheel. 4. Another view from the cab. The map on the right shows the location of TRUCK\_97 near Reading, PA, with other trucks (TRUCK\_106, TRUCK\_117) also visible.

## Video without Driver Identity Protection

This screenshot shows the same KOHLTECH VIDEO MANAGEMENT CENTER interface as above, but with driver identity protection disabled. The driver's face in the central video view (TRUCK\_97 - 2) is clearly visible and not blurred. The rest of the interface, including the vehicle list, metadata, and map, remains identical to the previous screenshot.
